THE FRESNO NURSERY

F. H. WILSON, Prop.

Box 615

FRESNO, CALIF.

N. B.—ALL OUR STOCK IS GROWN AT DINUBA AND LACJAC LOCALITIES, FAMOUS FOR RICH, MELLOW SOIL, INSURING GOOD, HEALTHY STOCK. WE GUARANTEE ALL OUR TREES FREE FROM ROOT KNOT OR ANY DISEASE.

To Our Patrons

In presenting this price list to the public we wish to thank our numerous patrons for past favors. It is our endeavor to conduct our business in such a manner as to merit the confidence of those dealing with us.

We personally superintend the propagation and handling of all nursery stock offered. The greatest care is exercised in having the varieties true to name, clean and healthy.

Our trees and vines have a perfect root system due to our growing same on virgin soil of such a fertile character to promote a healthy root and thrifty top. Office and sales-yard is at Fresno City. Delivery of stock can be made from either Fresno, or Dinuba, Cal.

Packing of orders is done by men of long experience in the business, and no pains are spared in having shipments reach the purchaser in the best possible condition.

We recommend that upon the arrival of stock it be immediately taken from the bale or box, well heeled in the ground, and thoroughly settled with water. This will keep them in good condition until ready to plant.

In planting see that the hole is sufficiently large to admit the roots in natural form. Be careful that all damaged roots are trimmed off. Then cut the top back to the point where you desire to form the head. Would recommend in this valley that not more than 12 to 16 inches of a top remain. Thus when the head is formed it affords a protection to the trunk from the hot summer sun. The limbs should be cut back to about two buds from the body of the tree. Care should be taken in planting that the tree stands but little deeper in the soil than it previously did in the nursery. Settle the trees immediately by irrigation or with a few buckets of water. Never use manure in contact with the roots. Keep the ground well cultivated and sufficiently moist to keep up a continual growth of the trees during the summer.

Address all orders and communications to Main Office.

THE FRESNO NURSERY

F. H. WILSON, Prop.

WE HAVE BEEN PLEASING OUR CUSTOMERS FOR TWENTY-ONE YEARS AND WE WILL CONTINUE TO PLEASE THEM IF PARTIES WANT GOOD STOCK, TRUE TO NAME AND WELL GROWN.

INSTRUCTIONS

Correspondents will please observe as far as possible the following regulations:

1. The name of varieties should be plainly written on a separate sheet of paper in order to prevent mistakes.

2. It is always advisable to send in orders as early as possible, as they are usually filled in the order in which they are received.

3. Persons not acquainted with the different varieties would do well to leave the selection to us, as we shall send only such as give general satisfaction.

4. State distinctly how you wish to ship—by freight or express; also designate the route; otherwise we will use our own discretion in forwarding; but in all cases the articles are at the risk of the purchaser after being shipped.

5. When contracts are made to deliver trees to any particular place, our responsibility ceases the day on which the purchaser was notified to receive the shipment.

6. Orders from unknown correspondents must be accompanied by a remittance or satisfactory reference. Remittances may be made by draft on San Francisco, or postal or express money order on Fresno, Cal.

7. Customers are requested to notify us at once if errors occur in filling orders, as we endeavor to make satisfactory amends.

8. Prospective buyers are requested to send us an exact list of their wants, for in some instances, where a quantity of trees are wanted we can make special prices.

GUARANTEE

Our trees are all budded or grafted from bearing trees. Our nursery stock is handled by experienced and careful men; nevertheless, with all our caution, mistakes of minor importance may occur.

Long experience has shown us the urgency of keeping our varieties true to name, and hence we are at all times anxious and willing to replace, on good and sufficient evidence, all trees that may prove otherwise; nevertheless, it is mutually understood and agreed between purchasers and ourselves that we shall not at any time be liable for any amount greater or in excess of the original price of the stock at date of sale. We solicit your patronage, but in justice to ourselves cannot accept your orders on any other terms.

Address all communications to Main Office.

THE FRESNO NURSERY

F. H. WILSON, Prop.

Box 615

FRESNO, CAL.

NOTE.—WE GROW OUR STOCK ON MELLOW, VIRGIN SOIL, HENCE THE SUPERIORITY, WE CLAIM FOR IT, OVER NURSERY STOCK GROWN IN EXHAUSTED SOILS DEVOID OF THE REQUISITES FOR MAKING A HEALTHY GROWTH.

Valuable Tables

DISTANCE FOR PLANTING.

Apricots	20 to 25 feet apart each way
Cherries	20 to 25 feet apart each way
Apples	20 to 22 feet apart each way
Pears	20 to 22 feet apart each way
Peaches	18 to 22 feet apart each way
Prunes	18 to 22 feet apart each way
Plums	18 to 22 feet apart each way
Grapes	8 to 10 feet apart each way
Currants and Gooseberries	2 by 6 feet
Raspberries and Blackberries	2 by 7 feet
Strawberry plants for field culture	1 by 1½ feet
Rhubarb	1½ by 6 feet

NUMBER OF TREES AND PLANTS ON AN ACRE AT VARIOUS DISTANCES.

1x1	43,560	10x10	435	19x19	120
2x2	10,890	11x11	360	20x20	108
3x3	4,840	12x12	302	22x22	98
4x4	2,722	13x13	257	25x25	69
5x5	1,742	14x14	222	30x30	48
6x6	1,210	15x15	193	35x35	35
7x7	888	16x16	170	40x40	27
8x8	680	17x17	150	50x50	17
9x9	537	18x18	134	60x60	12

To ascertain the number of trees or plants required for an acre: Multiply together the distance that the trees are to be set apart each way and divide this into 43,560 (the number of square feet in an acre) which will give the number required.

ONE OF OUR SPECIALTIES

WE ARE PREPARED TO SUPPLY UN-ROOTED GRAPE CUTTINGS OF ALL LEADING VARIETIES OF GRAPE VINES IN QUANTITIES TO ALL THOSE WISHING TO ROOT THEIR OWN VINES. NO ORDERS FOR LESS THAN 5,000 OF ANY ONE KIND, HOWEVER, ACCEPTED, AND PARTIES ORDERING CUTTINGS FROM US MUST SEND IN THEIR ORDERS SO AS TO REACH UP BEFORE FEBRUARY 1st, 1911.

WE MAKE OUR CUTTINGS FROM ESTABLISHED VINEYARDS, AND THOSE ENTIRELY FREE FROM DISEASE, INSURING HEALTHY STOCK IN EVERY PARTICULAR.

SEND IN A LIST OF YOUR WANTS FOR QUOTATIONS.

The Fresno Nursery

FRESNO, CAL.

Acreage and Location of Our Nurseries and Experimental Grounds:

Dinuba, Cal. - - 320 acres

Lac Jac, Cal. - 160 acres

IMPORTANT

All parties embarking in the Fruit Business should procure a copy of Prof. E. J. Wickson's "California Fruits and How to Grow Them," postpaid by us \$3.00 the copy. This work gives complete descriptions of all varieties of Fruit Trees grown in California, correct planting methods, pruning, grafting, budding; in fact, any information in detail as to the best way to proceed in successful Fruit Growing. This work we can recommend as the best book published, and it is a complete information given along practical and commercial lines. Do not fail to obtain this book. It is worth many times its cost. All advice given is no guess work but real information gained through actual experience. Prof. Wickson is in charge of the Agricultural Department of the State University, and his fame as a writer along Agricultural and Horticultural lines is world-wide.

The Dattier de Beyrouth Grape

We are prepared to supply Number One Rooted Vines of a new variety of Grape, which we have thoroughly tested and which has proven a money maker in every sense of the term. The new Grape was imported from France by us, and is known as the **DATTIER DE BEYROUTH**. It has been bearing with us for two seasons and fulfills every expectation as a shipping or table Grape. It also makes a high class raisin Grape. It is about two weeks earlier in ripening than the Malaga and its large size makes it very attractive and a ready seller. Bunches large, berries loose, never compact, this point being in its favor, rendering the packing of same easily performed. A more minute description of this Grape is about as follows:

Berries very large, oval in form, one inch and over long by three-quarters of an inch across in diameter; skin thin but tough, greenish at first, but as the Grape ripens it turns to a beautiful amber, covered with white bloom; very mealy, juicy and sweet, possessing little or no acidity. Its keeping qualities are of the best and even when allowed to remain on the vines until over-ripe shows no inclination to drop. We cannot do this Grape justice by describing it; it must be seen and eaten before it can be fully appreciated.

To give you an idea of its productiveness, we will add that we have 15 acres of the **DATTIER DE BEYROUTH** which were sold when marketed alongside of the Thompson Seedless, the latter bringing 90 cents a crate while the former brought \$2.00 to \$2.25 per crate. The **DATTIER DE BEYROUTH** requires a heavy or sub-irrigated soil to reach perfection. In light soil no phenomenal showing can be made.

As a money maker we predict for this Grape a great future. We have several thousand of these vines in Number One rooted stock, which we are selling to introduce same at the following prices:

\$3.00 per 100; \$20.00 per 1000.

Let us have your order before our stock is exhausted.

THE FRESNO NURSERY

F. H. WILSON, Prop.

Fresno, Cal.

THE Wilson Wonder Walnut

We are propagators of this wonderful Soft-shell Walnut, originated by Mr. F. C. Wilson of the Encinal Nurseries. This is one of the largest nuts so far introduced. It is a heavy and regular bearer and we venture to say that this Walnut will produce nuts on young trees and fetch returns quicker than any of the Walnut family. On the experimental grounds of Mr. Wilson many trees in nursery row from two to five feet tall and 18 months from the insertion of graft have borne from 8 to 36 nuts each, which we are sure is the record for early bearing. The parent tree has borne heavily since the second year and largely in clusters of from three to ten nuts in a cluster. As already stated it bears right along in the nursery row as soon as it is possible to do so on own growth of wood, maturing nuts within 18 months from insertion of graft in seedling.

Tree is a strong, sturdy grower, with broad, dark green leaves. The nut is abnormally large, with thin, smooth, perfectly sealed shell, well filled with exceedingly sweet, rich kernal. Kernal is as much sweeter than the common Walnut, as Sugar Corn is sweeter than common field corn. Its extra large size and good quality together with its early bearing makes this nut a money maker, and one does not have to wait a life-time to get returns.

Let us have your orders while our stock lasts. Our prices are:

\$5.00 each, \$8.00 for two trees; \$35.00 for
ten trees, \$300.00 a 100.

Address all orders to
